

SUCCESS STORY

Our customer, a worldwide major industrial group, was no longer able to use any of its training content, following the implementation of a new IT security policy. Working with this customer, we were able to quickly identify the most efficient migration method based on specific tools. The solution was deployed in record time, enabling our customer to make all e-learning resources available for employees promptly.

TESTIMONY

Operantis advised us on the development of a multimedia educational solution that perfectly fits our needs. It also includes several user-friendly features that were not identified in the initial specifications.

Thanks to its efficient teamwork, Operantis delivered ahead of schedule. Adopting a highly proactive approach, Operantis adapted its resources as needed to address any unplanned events.

Integrating feedback from previous projects in its overall approach, Operantis adapts to overcome any problems encountered.

Their efficient collaboration met our requirements at no extra cost.

OUR EXPERTISE

- Customer references including key industrial accounts (Aeronautics, Energy, Automotive, ...)
- A team with specialized skills
- Responsive Design adapted to screen size (PC / Tablet / Smartphone)

STANDARDISATION

Creation of a homogeneous and harmonized template

MANAGEMENT

Management of large projects: ramp-up (dedicated internal team and/or sub-contractors), off-shore

INDUSTRIALISATION

Proven process including implementation of specific tools, thorough quality control, optimised lead times...

OUR BUDGETARY FRAMEWORK

Three levels of complexity for migration

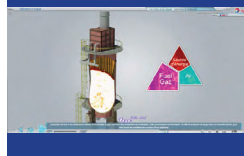

IDENTIFY

- Screen animations with no interactive functions
- No display phase (sequencing)
- No animated character
- No video conversion
- No exercises
- Existing source data

MEDIUM

- Screen click (simple interactivity)
- Between 1 and 5 display phases
- No animated character
- No video conversion
- Single answer / Multiple choice type exercises
- Existing source data

COMPLEX

- Diverse interactive functions
- Over 5 display phases
- Animated character(s)
- Video integration
- Miscellaneous exercises
